MOVE

*Simple changes can save you \$\$
as well as saving our environment.*

How we travel

- Walking and cycling is **FREE** and great exercise.
- Combine your car trips into one and car pool where possible.
- Use public transport whenever you can.

Maintaining the Car

- Regular servicing makes your car run more efficiently.
- Maintain the correct air pressure and remove roof racks to save on fuel costs.
- Drive efficiently – avoid stop-starting, fast accelerating or sudden braking – this all uses extra fuel.

Buying a New Car

- Consider fuel efficiency and emission control of different cars.
- Buy a smaller car if possible.
